

Alkaline Water

Clinical Documentary Report from Doctors

HIGH BLOOD PRRESSURE

Prof. kuninaka Hironage, Head of Kuninaka Hospital

For over 10 years of my experience, my concept towards minerals, especially pertaining to ionic calcium in high blood pressure and other diseases is most significant.

In accordance to the theory of medical Prof. Gato of Kyushu University on Vitamin K (because vitamin K enables the blood calcium to increase), or the consumption of more alkaline ionic water, the effectiveness of the increase in calcium in high blood pressure is more significant. Most illnesses are caused by too many fats in the diets, which lead to the deposition of cholesterol on the blood vessels which in turn constrict the blood flow. This results in high blood pressure.

By drinking alkaline ionic water for a period of 2 to 3 months, the blood pressure should slowly drop, because the alkaline ionic water is a good solvent which dissolves the cholesterol in the blood vessels.

HEART DISEASES

PROF. Kuwata Keijiroo, Doctor of Medicines

In my opinion, the wonder of alkaline ionic water is the ability to neutralize toxins, but it is not a medicine. The difference is that the medicine can only apply to each and individual case, whereas the alkaline ionic water can be consumed generally and its neutralising power is something which is very Much unexpected. Now, in brief, let me introduce to you a heart disease case and how it was cured. The patient was a 35 years old male suffering from valvular heart disease. For 5 years, his sickness deteriorated. He was in the Setagays Government Hospital for treatment.

During those 5 years, he had been in and out of the Hospital 5 to 6 times. He had undergone high tech examination such as angiogram by injecting VINYL via the vein into the heart. He consulted and sought treatment from many good doctors where later he underwent a major surgical operation. Upon his discharge from the hospital, he quite his job to convalesce.

However, each time when his illness relapsed, the attack seemed to be even more severe. Last year, in August, his relatives were in despair and expected he would not live much longer. It so happened at that time that the victim's relative came across the alkaline ionic water ionizer. His illness responded well and he is now on the road to recovery.

KIDNEY DISEASES

Prof. Kuwata Keijiroo, Doctor of Medicine

The difference between drinking alkaline ionic water and the normal water is that the excretion of urine is slightly more than intake. However, for severe kidney failure patients, water intake has to be restricted.

Consuming alkaline ionic water for these patients in controlled amounts proved to be beneficial.

Normal tap water contains phosphate, calcium carbonate and the acidic ions. These acidic ions tend to reduce the efficiency of the calcium ions.

Pure alkaline ionic water does not have these problems and it can effectively strengthen the heart and increase urination. After consuming the alkaline ionic water for a month, the amount of urea and uric acid in the blood will show a marked improvement but will not disappear completely.

However, if you continue to drink alkaline ionic water for a period of 6 to 12 months, the urea and uric acid should be grossly reduced. Intake of protein during this period should also be controlled, persistent drinking of alkaline ionic water should eliminate the toxic effect of the urea and uric acid from the body.

According to a foreign paper report, patients undergoing dialysis tend to have their negative ions significantly reduced and the positive ion increased. Hence, according to the above experiment and from my personal clinical experience, drinking alkaline ionic water increases the negative ions which will have a significant effect on various kidney diseases. When kidney diseases do not respond to various drugs, it is good to treat them with alkaline ionic water.

ECZEMA

Prof. Tamura Tatsuji, Keifuku Rehabilitation Centre

Eczema is used to describe several varieties of skin conditions which have a number of common features. The exact cause or causes of eczema are not fully understood. In many cases, eczema can be attributed to external irritants.

Let me introduce a patient who recovered from skin disease after consuming the alkaline ionic water. This patient suffered 10 years of eczema and could be cured effectively even under specialist treatment. This patient, who is 70 years of age, is the President of a vehicle spare parts company. After the war, his lower limbs suffered acute eczema and later became chronic. He was repeatedly treated in a specialist skin hospital.

The left limb responded well to treatment, but not so on the right limb. He suffered severe itchiness, which, when scratched led to bleeding. During the last 10 years, he was seen and treated by many doctors. When I first examined him, his lower limb around the joints was covered with vesicles. Weeping occurred owing to serum exuding from the vesicles.

I advised him to try consuming alkaline ionic water. He bought a water ionizer and consumed the alkaline ionic water religiously and used the acidic water to bathe the affected areas. After 2 weeks of treatment, the vesicles dried up. The eczema was completely cleared without any relapse after 11/2 months.

ALLERGY

Prof. Kuninaka Hironaga, Head of Kuninaka Hospital

Mr. Yamada, the head of Police Research Institute, suffered from severe allergy. He was treated repeatedly by skin specialist, but with no success. Then, he started consuming alkaline ionic water. The allergy responded very well and was soon completely cured. No relapse had occurred, although he had taken all kinds of food. He was most grateful and excited about this treatment.

As for myself, I had also suffered severe allergy. Ever since I began to consume alkaline ionic water, the allergy has recovered. Since then, I started a research on the effectiveness of alkaline ionic water. I discovered that most

allergy is due to acidification of body condition and is also related to consuming too much meat and sugar. In every allergy case, the patient's ionic calcium are excessively low which in turn lower the body resistance significantly. The body becomes overly sensitive and develops allergy easily. To stabilize the sensitivity, calcium solution is injected into the vein.

Therefore, it is clear that the alkaline ionic water which has ionic calcium can help to alleviate allergy.

The ionic calcium not only enhances the heart, urination, neutralization of toxins but controls acidity. It also enhances the digestive system and liver function. This will promote natural healing power and hence increase its resistance to allergy. In some special cases of illness which do not respond to drugs it is found to respond well to alkaline ionic water.

DIGESTIVE SYATEM PROBLEM

Prof. Kogure Keizoo, Kogure Clinic of Juntendo Hospital

The stomach is readily upset both by disases affecting the stomach and by other general illnesses. In addition, any nervous tension or anxiety frequently causes gastric upset, vague symptoms when they are under some strain.

The important role of alkaline ionic water in our stomach is to neutralise the secretion and strengthen its functions. Usually, after consuming the alkaline ionic water for 1 to 3 mins., the gastric juice increase to $\frac{1}{2}$ times. For those suffering from hypochlorhydria or achlorhydria (low in gastric juice) the present of alkaline ionic water will stimulate the stomach cells to secrete more gastric juice. This in turn enhances digestion and absorption of minerals.

However, on the other hand, those with hyperchlorhydria(high in gastric juice), the alkaline ionic water neutralizes the excessive gastric juice. Hence, it does not create any diverse reaction.

According to the medical lecturer from maeba University, the pH of the gastric secretion will still remain normal when alkaline ionic water is consumed. This proved that the ability of the alkaline ionic water is able to neutralise as well to stimulate the secretion.

Note: According to the Singapore Ministry of Health, Colo-rectal Cancer is 13% of cancer deaths. Colo-rectal cancer is one of the fastest-spreading cancer in Singapore and is fast overtaking lung cancer as the leading cancer killer. Those in the high-risk group are Chinese and those above 45 years. One in 25 Chinese has a possibility of being a victim---The Straits Times 18/7/1992

DIABETES

Prof. Kuwata Keijiroo, Doctor of Medicine

When I was serving in the Fiore Insurance Association, I used to examine many diabetic patients. Besides treating them with drugs, I provided them with alkaline ionic water. After consuming alkaline ionic water for one month, 15 diabetic patients were selected and sent to Tokyo University for further test and observations.

Initially, the more serious patients were a bit apprehensive about the treatment. When alkaline ionic water was consumed for some time, the sugar in the blood and urine ranged from a ratio of 300mg/1 to 2 mg/dc. There was a time where the patient had undergone 5 to 6 blood tests a day and detected to be within normal range. Results also showed that even 1 1/2 hours after meals, the blood sugar and urine ration was 100mg/dc:0mg/dc. The sugar in the urine has completely disappeared.

PRE-ECLAMPTIC TOXAEMIA

Prof. Watanabe Hospital

Alkaline ionic water improves body constituents and ensures effective healing to many illnesses. The uses of alkaline ionic water in gynaecological patients have proved to be very effective. The main reason for its effectiveness is that this water can neutralise toxins.

When given alkaline ionic water to pre-eclamptic toxemia cases, the results are very significant. During my long years of servicing the pre-eclamptic toxemia cases, I found that the women with pre-eclamptic toxemia who consumed alkaline ionic water tend to deliver healthier babies with stronger muscles. A survey report carried out on babies born in this group have intelligence above average.

OBESITY

Prof. Hatori Tasutaroo, Head of Akajiuiji Blood Centre, Yokohama Hospital, Faimama District

Due to a higher standard of living, our eating habits have changed. We consumed too much protein, fats and sugar. The excess fats and carbohydrates are in the body as fats. In the present lifestyle, Americans are more extravagant on food compared to Japanese. Due to this excessive intake, obesity is a significant problem. Normally, one out of five males and one out of four females is obese. The degree of "burn-out" in food intake largely depends on the amount of intake vitamins and minerals. When excessive intake of protein, carbohydrate and fats occurs, the requirement for vitamins and minerals increases. However, there is not much research carried out pertaining to the importance of vitamins and minerals.

Nowadays, many people suffer from acidification that leads to diabetes, heart diseases, cancer, liver and kidney diseases. If our food intake can be completely burned off, then there is no deposition of fats. Obviously, there will be no acidification problem and hence there should not be any sign of obesity.

The alkaline ionic water contains an abundance of ionic calcium. This ionic calcium helps in the "burning-off" process. By drinking ionic water, it provides sufficient minerals for our body. As a result, we do not need to watch our diet to stay slim.

Hence, alkaline ionic water is a savior for those suffering from obesity and many adult diseases, providing good assistance in enhancing good health.
